Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2007.

DETAILED ACTION

This action is in response to applicant's amendments submitted 5 January 2007.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Ziemba et al (US 6,368,307).

Ziemba teaches a power injector with a syringe (40), a housing (11), a drive member (within 11), a syringe retaining mechanism (15) with capture members (50) engaging retaining members on the syringe (44), with an actuator (25) to release the syringe.

3. Claims 13, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Neer et al (US 5,279,569).

Neer teaches a syringe retaining mechanism (flanges 85 coupled to pressure sleeve 31 and mounted on housing) adapted to couple with a syringe (32) being movable upon rotation of the syringe from a relaxed (retaining position Fig 5) and tensioned (Fig 4) state, and retaining ring (connected to 140).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ziemba in view of U.S. Patent No. 5,383,858 to Reilly et al. (hereinafter "Reilly").

Ziemba discloses the claimed invention as shown above. Ziemba does not disclose an encoding device. Reilly discloses an encoding device 70 on a syringe. See Figure 2. It would have been obvious to one of ordinary skill in the art to modify the invention of Ziemba, by including an encoding device, as suggested by Reilly, in order to prevent misdose of medication to a patient.

Allowable Subject Matter

4. Claims 18-20 are allowed.

5. Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest a retaining mechanism of a substantially elliptical flexible ring in combination with the other limitations of the claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-13, 16 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
